

BlueStone

Chemical Distribution

BlueStone, an SCE company, is a chemical distributor conveniently located in the Northeast region of Pennsylvania focused on the needs of the natural gas industry. BlueStone specializes in supplying the chemicals required for the hydrofracing and well completion processes. Due to our close proximity to the drilling sites and our rail delivery capabilities, BlueStone provides a very cost effective option for stimulation and completion companies working in the Marcellus region.

Our DEP approved facility will offer the combination of both an excellent location as well as a full service storage for all your chemical requirements in the region. With full rail access and indoor off loading, BlueStone handles bulk shipments and can deliver your product to the well site using our fleet of trucks.

BlueStone is strategically located within 100 miles of over 50% of all the wells currently planned for the Pennsylvania Marcellus region.

As a division of SCE Environmental Group, Inc., BlueStone can provide the security of working with a multi-million dollar company already located in the region. BlueStone not only provides a high level of technical expertise in the chemical distribution business but also years of experience in the environmental services market.

Mission:

To provide a valuable service to the natural gas market and establish BlueStone Chemicals as the largest regional supplier and distributor of stimulation and completion chemicals in the Marcellus region. Our focus is on sourcing, supplying, developing, and manufacturing safe, environmentally friendly “Green products” to be used in the horizontal hydrofracing process. BlueStone will offer a superior service to our customer at a cost competitive price while maintaining the highest safety and environmental standards in the industry.

Services Offered:

BlueStone offers a multitude of on the ground services including, but not limited to storage, solution blending, logistics, and shipping. Our close proximity to the wells can save you significant cost in transportation and maintain an inventory of your product within 100 miles of the region’s wells. We can also support your other locations in the larger Marcellus regions by shipping products to Williamsport, PA and Pittsburgh, PA locations.

Storage

BlueStone will store your proprietary products in our heated, DEP approved 25,000 sf warehouse while providing “just-in-time” delivery to the well site.

Solution Blending

In the near future, BlueStone will offer complete blending, mixing and toll manufacturing of friction reducers, biocides, and guar based gels. We can manufacture your specific formula under full customer confidentiality or provide you with our in-house product formulations to meet your needs. Our current capacity will handle over 1,000 totes of product, however, we can quickly expand to accommodate your requirements as your business grows. Our Quality Control and Quality Assurance departments will also provide all required release testing to assure your products are meeting your specifications.

Inventory Management

We will maintain and monitor your product inventory to ensure quick delivery to your customers as well as your operation in the Marcellus region. Our staff will closely work with your organization to provide regular feedback and customer access to product inventory changes and fluctuations.

Logistics

In addition to meeting your special warehousing and handling needs, BlueStone provides additional logistics services. Delivering manufactured goods to your Marcellus customers could not be easier.

- certificates of analysis and material safety data sheet
- distribution billing and record keeping
- tote blending and dilution
- customized transportation for the NE Marcellus region
- customized warehousing inventory management
- bulk liquid services rail car to tank, truck or tote
- packaging and product labeling services
- rail bulk transfer services
- full complement of environmental services from spill prevention planning to well site clean up

Quality Assurance and Quality Control

BlueStone meets all requirements of health, safety, and environmental regulations while operating under the Pennsylvania Department of Environmental Protection regulations. BlueStone also meets all national, and local requirements for chemical storage and distribution.

Facilities:

25,000 square feet of space in Pittston, PA that is quickly expandable to 125,000 sf to meet our customers needs for rapid growth. Rail and truck access will give you the flexibility to better control the transportation cost as your business expands in the Marcellus region. Trans-loading capabilities will allow for bulk liquid delivery as well as bulk sand delivery to Northeast Pennsylvania. Our heated warehouse has 24-7 security with state-of-the-art fire systems with remote monitoring. Extensive on-site trailer parking is available. We are less than 2 miles from I-81 and I-476.
